## Take The Stress Out of Moving

The thought of moving can be daunting. Packing all of your belongings, hauling boxes, and furniture to your new place and then unpacking everything can be a time-consuming and sometimes stressful experience. Make your next move a breeze with these helpful tips.

### 1 Keep, Donate or Toss

As soon as you know that you'll be moving, start sorting your belongings and get rid of the items that won't be making the move with you. Sort your items into three piles: keep, donate and toss. There is no need to move things that you haven't used in two years - or won't use in your new home.

### 2 Label Everything

Organization is key when moving and saves tons of time searching for your favorite items later. When packing, be sure to indicate the name of the room(s) on the outside of the boxes. Putting each box in the proper room right off the truck will save time - and avoid moving boxes more than once.

### 3 Enlist the Help of Friends

There's no better way to move than by including your friends to make the move fun! Celebrate moving day by enlisting the help of friends - bringing in pizza and your favorite beverages to make the day enjoyable and memorable!

### 4 Don't Expect To Be Done in A Day

Remember, you will be living in this home for awhile. There's no need to rush to get everything done in one day. Take your time unpacking and organizing your new home. Relax and enjoy making your new house a home.
